VI Congress

with international participation

26th – 28th of May 2022

Dear colleagues, associates and friends,

From the last congress until today, the world has faced one of the biggest challenges, where an invisible particle in the form of a virus reminded us all of our vulnerabilities, weaknesses and brought us into a situation of questioning values and priorities. Therefore, we want to dedicate our VI Congress to the new realities, experiences and knowledge we have gained in this period, which relate to the mental health of children and youth.

It is my great pleasure to invite you to our VI Congress which will be held 26th-28th May 2022, in the beautiful Vrnjaska Banja. It is a more developed Serbian spa, with a long healing tradition, a spa where whole generations came for their “dose of health”, and yet it is much more than that, much more than a healing place and much more than “just” a spa.

We want to welcome all members of our society as well as all of you who have been cooperating with us for years and contributing to making our mission meaningful. Along with domestic and foreign experts in the field of mental health of children and youth, but also those who influence the importance of mental health - our colleagues from social protection, education, justice service, we want to discuss and hear about new knowledge, experiences and realities when it comes to children and young people, as well as all those who make their childhood and youth a period of maximum prosperity. We want the congress to be a new opportunity to meet, socialize and establish new contacts and relationships.

This time we will have plenary lectures, round tables, case studies, workshops and a poster session. All lectures at the symposium will go through the plenum, so there will be an opportunity for all of us to listen to invited speakers telling us about new experiences and knowledge in the field of mental health of children and youth.

The proposed topics are those that we believe correspond to the most significant and / or most common problems faced by children and young people, as well as those people who deal with them.

The congress will be under the auspices of the Ministry of Health of the Republic of Serbia, accredited by the Health Council of Serbia and registered with the Social Welfare Chamber.

Until the publication of the final program, all activities and information about the organization of the Congress can be followed on our website: www.deaps.org.

I look forward to working together and gathering at the Congress in Vrnjačka Banja.

President of the Society
Prof. Dr. Milica Pejović Milovančević

PRESENTATION REGISTRATION / POSTER SHOULD CONTAIN

- Title of the presentation / poster
- Name and surname of the author
- Name of institution / organization
- Address, telephone / fax, e-mail
- Key words (up to 5 words)
